

BY NATIONAL CYCLE

Accessories for BMW® R Series RS and R Series RT Motorcycles

Welcome To ZTechnik Worldwide

We are pleased to bring you this accessory catalogue and welcome you to the ZTechnik product line. ZTechnik, a division of National Cycle, Inc., specializes in high quality, innovative accessories for BMW Motorcycles.

The name itself, ZTechnik, is from the German "Zubehör Technik," which roughly translates to "technical accessories" in English. The philosophy of ZTechnik is to adhere to strict standards to produce only the highest quality accessories possible in order to enhance the rider's total experience.

Come ride with us, and you will experience the spark that drives a product into the design phase. It's not where we hang our helmets that these accessories are born... they find a place onto the pages of this catalogue after many miles of riding and talking with other BMW riders. The riders, the roads, and the experiences are all very different, but the one common bond all motorcyclists seem to share is the innate urge to mold their bike to themselves.

As great as the machines are, riders need products and accessories to solve problems, to carry gear, or simply for the fun of customizing their motorcycle, for making their bike unique.

We would like ZTechnik to augment your needs when it comes time to make your BMW motorcycle special. Our highly trained, technically skilled staff is at your service with our latest innovative products designed to enhance your enjoyment of riding.

Good Riding!

Barry Willey
President, National Cycle, Inc.

MATERIAL ICONS

Developed for motorcycle windscreen use by National Cycle, **Quantum® hardcoating** takes a quantum leap forward in scratch resistance, superb optics and long outdoor life. National Cycle and ZTechnik apply this crystal clear hardcoating to thick gauged polycarbonate material. The combined result is the strongest, most scratch resistant windscreen material available worldwide.

FMR hardcoated polycarbonate windscreens provide unbeatable strength, excellent optical quality, and extremely good scratch resistance. FMR polycarbonate is the OEM motorcycle industry standard and was originally introduced to the motorcycle industry by National Cycle, Inc.

High strength **Stainless Steel** material is extremely resistant to corrosion and will not fatigue under weight bearing, high stress loads. Finish varies depending on product.

High strength **Steel** material will not fatigue with weight bearing and high stress loads. Finish varies depending on product.

Our **Machined Aluminum** products are impressively milled and solidly constructed. Available in several anodized finishes.

Cast Metal, a time-honored method of pouring hot metal into a mold, enables us to create complex and multi-dimensional designs.

OTHER ICONS

All Hardware and Fasteners Included that are required to mount the item. Supplemental hardware may be required for certain models as noted in our application chart.

Uses Existing Mounting Hardware and requires no supplemental fasteners.

An exclusive **3-Year Warranty** covers all registered ZTechnik polycarbonate windscreens against breakage. Register yours at www.ztechnik.com.

ABE Approved for German homologation. All ZTechnik windscreens are U.S. DOT approved as well.

ABE Pending. U.S. DOT approved.

New Products are identified with this icon at the top of each page.

All ZTechnik products are manufactured in Maywood, IL U.S.A.

POLYCARBONATE... OR ACRYLIC? YOU DECIDE!

When you watch ZTechnik's online video demonstration, you'll see why they manufacture their windscreens from impact resistant polycarbonate material. There is simply nothing else that stands up to its strength and durability.

Compared to standard acrylic windshields, polycarbonate is **20X more impact resistant** and **23X more crack resistant**. That's performance you can feel comfortable riding behind!

For Quality, Value and Price, whether it's FMR or Quantum hardcoated, your polycarbonate windshield from ZTechnik will outperform any other windshield available.

"The Z2351 VStream® windshield exceeds the OEM and Cal Science by a mile. This is the tallest and widest screen for the new BMW R1200RT, and is by far the best after market screen on the market. At the 2015 IBR, many riders were asking me about it, and I couldn't say enough good things about it. about it."

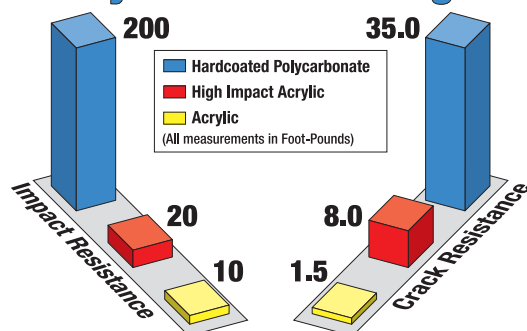

Hayou

"What a superior windshield over the stock part! No more buffeting from the wind, and the wind noise is reduced by at least half."

"This is the third VStream windshield I have had on my bikes (2008 Honda ST1300, 2013 Yamaha FJR1300, 2010 BMW R1200RT). You get what you pay for and this is the best money you could spend on your new 2015 R1200RT."

Karl R.

Polycarbonate Strength

Welcome To ZTechnik Worldwide

ZTECHNIK'S QUANTUM LEAP IN WINDSCREEN HARDCOATINGS

What makes ZTechnik's z hardcoated windscreens better than all the others?

SUPERIOR SCRATCH RESISTANCE

30X more scratch resistance than typical acrylic windscreens is saying a lot! Think of it as 30X more miles per windshield. FMR hardcoated polycarbonate is a big improvement over acrylic, yet Quantum hardcoated polycarbonate even has **10X better scratch resistance than FMR**. That's the kind of performance and strength you need from a motorcycle windshield!

GLARE-FREE OPTICS

Think about riding into the sun – or at oncoming headlights at night – and not having to look through the glare of fine scratches that eventually show up on your screen. Quantum hardcoating gives your windshield much better optical definition and clarity, and your windshield will stay that way a lot longer.

On the left you'll see the motorcycle windshield with typical surface wear, scratches and abrasions. This is NOT what you want in front of you when facing oncoming traffic!

Scientific laboratory monitoring and measurement instruments, like ZTechnik's Tabor 5130 Abraser, test the surface wear on both hardcoated and uncoated windshield materials.

AND... ZTECHNIK'S 3-YEAR UNBREAKABLE WARRANTY

We believe we make the **world's best and toughest windscreens** and we back up that commitment with a **3-Year Warranty against breakage**. If your ZTechnik polycarbonate windshield breaks, it will be replaced free of charge! No other windshield manufacturer makes that promise and commitment!

Registering your ZTechnik windshield is easy! Just go to www.ztechnik.com.

Welcome To ZTechnik Worldwide

THE REVOLUTIONARY VSTREAM® WINDSCREENS

HOW DOES VSTREAM WORK?

ZTechnik revolutionized windscreen performance with their VStream® windscreens. They are well known not only for superior wind-deflecting comfort but also for a riding environment that is calm and quiet. In order to create a more comfortable ride, other manufacturers offer extra-tall windscreens or spoiler tops to try to lift the air stream. But ZTechnik designed, for the first time ever, a windscreen with contours calculated and adjusted to manage the riding environment.

QUIET

The airflow pattern of the wake from most windscreens is called a *van Karman vortex*. At speeds of 50-90 mph, the air swirls off the windshield in an approximate 90-degree rotational vortex. It then hits the bottom of the rider's neck on the way up, and curves off the shoulders at approximately 45 degrees. The VStream is named for its unique **patented "V" shape**. This design **quiets the ride** because it pushes that vortex out and away from the side of the rider's head, reducing irritating wind noise.

COMFORT

The VStream's advanced "V" profile, unique three-dimensional contours, and smooth radiused edges all contribute to **calmness and comfort** in the riding environment. Unsettling wind turbulence is effectively pushed aside, and this fatigue-reducing experience is greatly appreciated by the rider and passenger. Many satisfied customers claim the VStream is definitely the most comfortable windscreen they've owned.

DURABILITY AND OPTICAL CLARITY

In addition, VStream windscreens have an outstanding level of **durability and optical clarity** that is the result of over 73 years of windscreen manufacturing and advanced technology in forming and coating. Experience the VStream windscreens and see why they are **the most comfortable windscreen you can ride behind** on a BMW® motorcycle.

"I rode my 2015 BMW R1200RT for about 3,000 miles and was not happy with the noise and buffeting behind the OEM/stock screen. I contacted A&S Cycles in Roseville, CA and purchased the "Tall" version of the ZTechnik VStream®. I tried it briefly, and it was too tall for me. A&S sent me the shorter screen, and it was perfect.

"I've now put just over 5,000 miles on the new one, and really, it's perfect for me. It gives me ventilation when I want it and, with just a little height adjustment, gets the wind off my helmet. When it's cold, a full raise of the screen helps isolate me from the cold. It's a great product. Because of my background, I especially appreciate the fact that it's polycarbonate.

"I should tell you that on the BMW MOA Forums, I always tell anyone who asks about windscreens to look at ZTechnik.

"Thanks for the fine product!"

John G.

VStream® Windscreens for 2015-22 R1200/1250RS

WINDSCREENS
AND ACCESSORIES

R SERIES RS

Z2373

Z2374

Z2375

Complete OEM height adjustability is maintained along with full left/right steering lock clearances.

VStream Windscreens

Z2373 VStream Sport Windscreen

Z2374 VStream Sport Touring Windscreen

Z2375 VStream Tall Touring Windscreen

Fits 2015-18 R1200RS; 2019-22 R1250RS.

Starting with the original groundbreaking R100RS and through the R1150RS, the RS models were legendary in BMW's product line. Now sport touring enthusiasts everywhere welcome back the RS platform with the new R1200RS.

ZTechnik® has designed new VStream® Windscreens in three sizes and tints for the new R1200RS. Three sizes means there is a perfectly proportioned windscreen for almost every rider. All will offer improved wind protection and riding comfort compared to other aftermarket windscreens.

Like all ZTechnik polycarbonate VStream Windscreens, they're covered by ZTechnik's exclusive 3-Year Warranty against breakage.

VStream® Windscreens for 2021-22 R1250RT

NEW

WINDSCREENS
AND ACCESSORIES

R SERIES RT

Z2348

Z2349

VStream Windscreens

Z2348 VStream Windscreen

Z2349 VStream Tall Windscreen

Fits 2021-22 R1250RT.

The first accessory you'll want to buy for your new R1250RT is a ZTechnik VStream Windscreen! Consider it an investment that pays dividends in riding enjoyment.

The Z2348 measures 1.50" taller than stock, while the Z2349 measures a full 3.50" taller than stock for taller riders or for those wanting extra wind protection.

ZTechnik's exclusive Quantum® hardcoated polycarbonate gives you unbeatable scratch resistance with unmatched strength and durability.

Both of these polycarbonate windscreens are backed by ZTechnik's 3-Year Warranty against breakage.

Think about riding into the sun's glare, or riding at night into oncoming headlights, without having to strain to see through the reflected haze from fine scratches and abrasions on your windscreen (above left). This is not the optimal view of the road ahead for ANY rider.

ZTechnik's exclusive Quantum® hardcoating gives your windscreen much better optical definition and clarity by preventing and reducing the buildup of scratches and abrasions.

Quantum delivers 30X more scratch resistance than typical acrylic material, and even 10X more than the standard FMR hardcoated polycarbonate!

With Quantum hardcoating, your windscreen will be clearer and will stay that way a lot longer. That's the kind of performance and strength you need in a motorcycle windscreen.

Specifications and Materials

VStream® Windscreens for 2005-13 R1200RT

WINDSCREENS
AND ACCESSORIES

R SERIES RT

Z2402

Z2403

VStream Windscreens

Z2402 VStream Windscreen

Z2403 Extra Tall VStream Windscreen

Fits 2005-13 R1200RT.

The Z2402 will be the most versatile and appreciated wind management accessory you will ever purchase. It's so quiet, even your passenger will be able to hear the radio. Every rider who has taken the Z2402 for a test ride comes back and makes the switch – to VStream!

The Z2402 measures 1.50" taller than stock, while the Z2403 measures a full 3.50" taller than stock for taller riders or for those wanting extra wind protection.

The taller screen features a relief vent cutout to equalize the backpressure caused by extra-large screens, where still air behind the screen creates a low pressure area, causing fast moving turbulent air to rush in. This relief vent reduces buffeting on the back of the rider's helmet.

ZTechnik's exclusive Quantum® hardcoated polycarbonate gives you unbeatable scratch resistance with unmatched strength and durability.

Both of these polycarbonate windscreens are backed by ZTechnik's 3-Year Warranty against breakage.

Z2401 VStream Windscreen

Z2458 VStream Tall Windscreen

Z2459 VStream Low Windscreen

Fits 1994-00 R1100RT.

ZTechnik takes the R1150RT and R1100RT to unprecedented levels of comfort, quiet, performance and strength!

The Z2400/Z2401 VStream windscreen is 2.50" taller than stock. Your riding time on the RT will never be the same after you install this screen!

ZTechnik also offers the Z2456/Z2458 – 4.50" taller than stock – for those who are taller than the average RT pilot, or who demand maximum wind protection. If the stock R1100RT windshield height is too tall for you, try the new Z2459 VStream on your bike. You'll get superior performance and a quieter ride with VStream's patented "V" shape.

All these windscreens are made from extra-thick 6.0mm thick Quantum® hardcoated polycarbonate. This is the toughest, most impact resistant and scratch resistant windscreen you will find – anywhere!

ZTechnik® Engine Guards for R Series RS/R Series RT

TOURING, COMFORT
AND CONVENIENCE

R SERIES RS/RT

Touring, Comfort, and Convenience

Z7101 Stainless Steel Engine Guards

Fits 2005-09 R1200RT.

Z7103 Stainless Steel Engine Guards

Fits 2015-18 R1200RT.

Z7105-002 Powdercoated Steel Engine Guards

Fits 1993-00 R1100RS, 1994-00 R1100RT, 2001-04 R1150RS, 2001-04 R1150RT.

ZTechnik's Stainless Steel Engine Guards will never rust like powdercoated steel engine guards. They are carefully designed to allow clearance for oil changes or valve cover access, so they don't need to be removed for routine maintenance.

Guards attach to the engine mounts – not the engine covers – to protect the engine heads and not destroy them. Integrated top brackets on each guard allow the rider to mount accessory lights, video cameras, or whatever they can imagine!

ZTechnik Engine Guards are media blasted, then electropolished for a textured matte finish.

NOTE: Not compatible with ZTechnik or aftermarket exhaust headers, as they will not allow for installation of O² sensor.

Maintenance-Friendly Design and a Handy Accessory Bracket

ZTechnik's Engine Guards are carefully designed to allow clearance for valve cover access or oil changes, so they don't need to be removed for routine maintenance. An integrated accessory bracket on each Engine Guard allows you to mount aftermarket lights, video cameras or whatever you can imagine (available on all but the Z7101 and Z7102 models).

Materials and Specifications

Beadblasted and Electropolished Stainless Steel; 304 Stainless Steel Tubing, Stainless Steel Fasteners; All Hardware Included

866-ZTECHNK (866-983-2465)

ZTechnik® Engine Guards for R Series RS/R Series RT

**TOURING, COMFORT
AND CONVENIENCE****R SERIES RS/RT****Z7106-002****Z7107-003**

Maintenance-Friendly Design and a Handy Accessory Bracket

ZTechnik's Engine Guards are carefully designed to allow clearance for valve cover access or oil changes, so they don't need to be removed for routine maintenance.

Touring, Comfort, and Convenience

Z7106-002 Powdercoated Steel Engine Guards

Fits 2019-21 R1250RS, R1250RT

Z7107-003 Stainless Steel Engine Guards

Fits 2019-21 R1250RS, R1250RT

ZTechnik's Engine Guards are now available in both the original Electropolished/Beadblasted Stainless Steel finish and a new E-Coated/Powdercoated Black finish that looks great on the new models.

The E-Coat (Electrophoretic Coating) is applied inside and out to eliminate rust and corrosion, and the Black Powdercoating makes the finish tough and long lasting.

ZTechnik Engine Guards attach to the engine mounts – not the engine covers – to protect the motor's heads/valve covers. Integrated top brackets on each guard allow the rider to mount accessory lights, video cameras, or whatever they can imagine. These Engine Guards are carefully designed to allow clearance for oil changes or valve cover access, so they don't need to be removed for routine maintenance.

For greater comfort on longer rides, mount 1-inch clamp-on foot pegs to the Engine Guard's upper or forward sections.

All mounting hardware is included, along with easy-to-follow installation instructions.

Materials and Specifications

High Strength Steel with E-Coating and Black Epoxy Powdercoat, Stainless Steel Fasteners; All Hardware Included

Electropolished/Beadblasted Stainless Steel; 304 Stainless Steel Tubing, Stainless Steel Fasteners; All Hardware Included

Trim Accessories

Carbon Fiber Trim

Z8892

Genuine Carbon Fiber Trim

Z8892 Carbon Fiber Fuel Cap Trim

Fits a range of later model BMW motorcycles with exposed fuel trim ring torx fasteners.

Z8602 Carbon Fiber Gauge Panel Trim

Fits 1994-04 R1100/1150RT.

The 2-piece Z8602 is a specialty fit for these early touring models.

Z8500 Carbon Fiber Fuel Tank Protector

Fits a wide range of RT and RS models. Measures 7.50" (19.0cm) long. Genuine carbon fiber cloth is protected by a clear, smooth resin top coat that will not yellow. 3M® waterproof adhesive means no peeling like the lower cost protectors. Styled for the BMW rider.

Z8502 Carbon Fiber Fuel Tank Protector

Fits late-model R1200RT motorcycles. The compact size will not interfere with most tank bag mounts.

Z8502

Poured Clear Resin Layer

Woven Carbon Fiber Layer

Pressure Sensitive Adhesive Layer

Laminate Construction of Genuine Carbon Fiber

High quality, genuine woven carbon fiber material is first cut to shape with a precision die.

Next, a clear resin is carefully applied so that the entire perimeter has a smooth, radiused edge, producing a fluid transition to the contact surface of the motorcycle at all points.

A pressure sensitive adhesive backing is applied that securely, but safely, attaches the carbon fiber piece to the motorcycle.

Shield Wash™/RainZip® for All Windscreens/Faceshields

Windscreen Care and Maintenance

N1401-01 Shield Wash Windscreen Cleaner

For All Motorcycle Windscreens and Faceshields.

We use our in-house chemical lab and Tantec™ Contact Angle Meter testing equipment to analyze how surface tension created by various plastic treatments, cleaners, and polishing products affect the surface of the windscreen and its ability to stay clean.

After extensive road testing and research, we hit on the right combination of cloth and chemical that will keep the rider's windscreen as clean as possible while on the road.

Our Shield Wash™ is made to create that low surface tension that is the key to keeping a windscreen clean. Just as important is the cloth. The cleaning cloth we use is soft, but it lifts and holds dirt. It provides just the right amount of absorbency as well.

National Cycle Shield Wash is designed to effectively clean virtually any optical part – windscreens, faceshields, sunglasses, etc. It is fully compatible with our exclusive Quantum® hardcoating, as well as GE's FMR hardcoating. It also works well on all High Impact Acrylic and standard acrylic surfaces.

Materials and Specifications

The Shield Wash cleaning kit includes an eight-ounce bottle of Shield Wash and a one-ounce refillable bottle with a small microfiber cloth to carry on the motorcycle. It's everything a rider needs to keep their windscreen sparkling clean!

Windscreen Care and Maintenance

N1410-01 RainZip Rain Repellent Treatment

For All Motorcycle Windscreens and Faceshields.

To keep your windscreen clearer in rainy weather, National Cycle and ZTechnik developed RainZip®, a specially formulated rain repellent treatment that is safe to use on any Quantum® or FMR hardcoated Windscreen. And, it's safe to use on ANY motorcycle windscreen, as well as helmet faceshields and goggles.

RainZip is hydrophobic – when rain accumulates on the windscreen, RainZip causes it to effectively bead up and blow away, even at riding speeds of only 20-30MPH.

RainZip will give riders a clearer view of the road ahead... especially when it's wet!

Materials and Specifications

RainZip is available in a 3-oz. size with a special application cloth – enough for three applications. One application will last 3-4 months.

ZTechnik® Great Ideas for All BMW® Motorcycles

Slip the D-ring behind the lock bar and push the lock shut. Simply use your key to unlock the helmets when it's time to go.

Touring, Comfort, and Convenience

Z5505A License Plate Bracket Helmet Locks

Fits All USA, Canadian and Australian Plates.

Z5506 License Plate Bracket Helmet Locks

Fits All Japanese Plates.

The ZTechnik Helmet Lock for BMW motorcycles uses the easily accessible license plate bracket to provide leave-behind security for two full-face helmets. A sturdy push-lock mechanism accepts D-ring or similar helmet closures.

The Helmet Lock is made from high strength steel with black powdercoat, and is furnished with two matched keys.

Note: Because the state of Wisconsin does not comply with SAE license plate standards, fitment of Wisconsin plates to the Z5505A is marginal. Wisconsin plates may be mounted, however only the top two holes will match the plates.

Materials and Specifications

High Strength Steel with Black Epoxy Powdercoat;
Uses Existing License Plate Hardware and Fasteners;
Height: 6.50" (16.5cm); Width: 6.75" (17.1cm)

ZTechnik was formed in 2000 to provide BMW riders with windscreens and accessories of OEM quality. Over the years, the ZTechnik brand has gained worldwide recognition, and our mission remains the same.

ZTechnik products are designed, engineered and manufactured by National Cycle, Inc. in the U.S.A. Our windscreen line is the finest you can buy. We start with the best materials and incorporate our state-of-the-art manufacturing technology. Each product is engineered directly on the bike for an OEM-quality fit and finish.

At ZTechnik, we think about every product from the rider's perspective. We measure the value of any accessory by how it increases the rider's enjoyment and whether it gives him or her more confidence and ability on the road.

ZTechnik is releasing new products almost every month of the year! This new catalogue provides up-to-date information for riders worldwide.

We get constant feedback from dealers and customers for new products and features. The ZTechnik Engineering and Production Teams are working hard to bring these to you and your customers!

Thank you for your support, and good riding!
