and AirFlares<sup>™</sup> for SxS UTVs**

## Why Are National Cycle SxS Windshields Unique?

Only National Cycle has the technology and manufacturing expertise to post-coat a polycarbonate windshield so it will hold up to rugged off-road use and repeated windshield wiper action, no matter how muddy or dirty.

Since 1998, National Cycle has manufactured polycarbonate windshields for use with wipers using our exclusive **Quantum® hardcoating**. Quantum is **10X** more abrasion resistant than standard FMR hardcoated polycarbonate, and **30X** more than windshields made from commonly acrylic.

Quantum has surpassed all consumer and industry expectations and is the most effective hardcoating available. Only Quantum® hardcoated polycarbonate has an **ANSI AS4/5 certification**. This allows the windshield to be used on roadways where State vehicle laws allow.

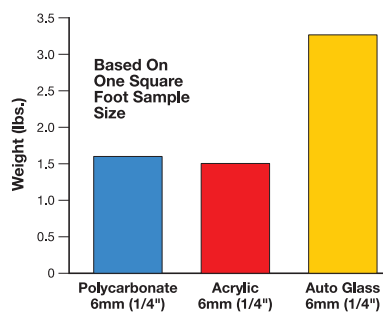

### Significant Material Difference

- Automotive glass is nearly twice as heavy as plastic and prone to cracking and breaking during rigorous off-road use
- Acrylic windshields are prone to scratching and cracking, and would never stand up to the repeated windshield wiper use
- Both automotive glass and acrylic are highly vulnerable to breakage under moderate impact, unlike polycarbonate

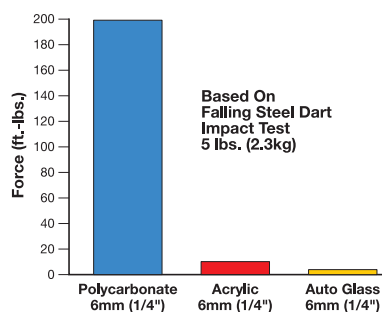

*Automotive Glass:  
Great for your automobile, but  
not for your off-road UTV.*

### WEIGHT DIFFERENCE

### IMPACT RESISTANCE

### Secure Mounts

National Cycle's patented **Snap-Fit™ Clamps** are attractive and rustproof. This easy-to-use, industrial-grade plastic clamp stands up to a harsh off-road use.

### Rain Gutter Edge

Our windshields have a tightly rolled top edge and a wide-flanged rubber gasket that helps prevent water or washer fluid from rolling to the inside of the cab.

### Wash'n'Wipe™ Capable

All windshields are pre-drilled for adding an optional Wash'n'Wipe™ Kit.

Shown with optional Wash'n'Wipe™ Kit installed.

## WASH'N'WIPE™

### Optional Wash'n'Wipe™ Kits

You can purchase a National Cycle Wash'n'Wipe™ Kit (sold separately) along with your windshield, or you can add the Kit at a later time. Kits come with complete installation instructions.

### Wiper Arm and Motor

A full-size wiper arm is powered by an auto-off Doga™ motor, has a molded protective cover, and is operated by a conveniently accessible toggle switch.

### Washer Reservoir

The Washer Fluid Reservoir and pump secure to the inside of the vehicle. The pump switch mounts in the cab interior and has a weatherproof rating of IP-64 (dustproof and water-resistant).

## 3D Formed Windshields

Once again, National Cycle extended the boundaries of windshield design by forming **3D curvature** into the traditional flat SxS UTV windshield. This is accomplished without sacrificing the use of our tough Quantum® hardcoated polycarbonate material.

The benefits of a 3D-formed windshield are striking good looks, a beautiful cockpit view, and **substantial added rigidity**, which is particularly noticeable in full-size windshields.

National Cycle's 3D SxS windshields are available for Polaris® RZR, Honda® Pioneer and KYMCO UXV series UTVs. All future SxS UTV windshield development will utilize our new 3D forming technology as well.

*Shown with optional Wash'n'Wipe™ Kit installed.*

**All National Cycle SxS UTV windshields come with our factory 3-Year Unbreakable Warranty. Complete warranty details available online.**

## National Cycle AirFlares™

UTV riders thrash around in dirt, mud, sand and rain. **National Cycle AirFlares™** not only keep pace with the terrain, but also maximize the effectiveness and extend the comfort of the front windshield on SxS vehicles. AirFlares are side shields with flared trailing edges that deflect and divert dirt, mud, sand and rain from curling into the cockpit. In addition, they are highly effective brush guards.

AirFlares are made from **3D-formed Quantum® hardcoated polycarbonate** for long-lasting scratch resistance and durability. National Cycle engineers all products directly on the vehicle. Precision CNC routing and forming ensure every piece fits the vehicle it was designed for. Installation is simple and can be done in 15 minutes or less. AirFlares mount to the vehicle's frame with a secure, no-rust, Snap-Fit™ Clamp system. No drilling or alteration to the vehicle is necessary.

AirFlares stand up to rugged off-road use and, when installed, offer a clear, unobstructed view from inside the cockpit.
